

My Health Care Wishes App Wallet Cards

Instructions for Wallet Card

- Complete the information on the front and back of the card.
- Cut out card (outer edges) and fold along the center line. If you wish, you can laminate the card.
- Fold and place in your wallet behind your driver's license, insurance card, or ID.

For iPhone and Android Smartphone Users

The wallet card tells a hospital and physician you have a digital version of your advance medical directive documents on your smartphone (Android or iPhone). One click on the icon and a hospital or physician can view, email, and print out your advance care plan.

My Health Care Wishes App	
My Advance Care Plan Documents are on my smartphone . You have my permission to view, email, and print these documents using the applicable unlock codes below.	My Primary Proxy: _____ Phone: _____
My Signature: _____	My Secondary Proxy: _____ Phone: _____

Phone Code: _____	Hard Copy Location: _____
Document Code: _____	
Medical & Insurance Info Code: _____	

For NON-Smartphone Users

This wallet card is important, even if you don't have a smartphone. It tells a hospital and/or physician you have a proxy who has your advance medical directive documents stored on his/her smartphone (Android or iPhone). One telephone call to your proxy from the hospital and/or physician and your advance care plan documents can be immediately made available by email for viewing, emailing, and printing.
